*then decide for
yourself*

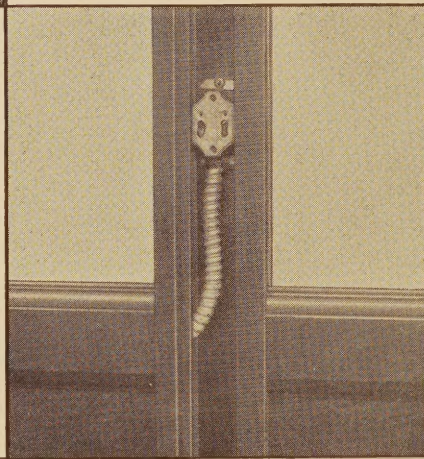

"Business as usual" with partitions being installed saving time, rent, expense. Panels are quickly set in place and securely fastened. With these units in multiples of five inches, any condition of length can be quickly met.

This adjustable base mould allows for any unevenness in floor; also permits carpet or linoleum to be inserted underneath partition. Note also attractive detail of all these members.

One of several clips (on both sides) which hold panels in a rigid assembly. These clips also have an additional advantage—they facilitate erection and dismantling. *No screws or bolts.*

Pilaster caps *snap* on and cover all means of assembly. This construction permits quick removal for wiring purposes or for dismantling. It also results in a finished appearance—no screws.

Strength and Resourcefulness of the Hauserman Organization

Exclusive steel partition manufacturers for the past twelve years—not a side line.

Our service is complete—we deliver a finished result.

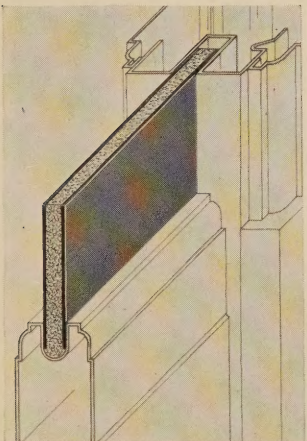

We lay out the job, make the partition, erect it, glaze and finish it and rearrange it as often as required through the life of the building—all with Hauserman trained men.

We handle the repeat or small order, just as efficiently and promptly as the large ones.

Steel Clips

One of several steel clips (on both sides) which hold panels in a rigid assembly

Sound Deadening Panel

The sound deadening panel (packed panel) is standard on Type "T"

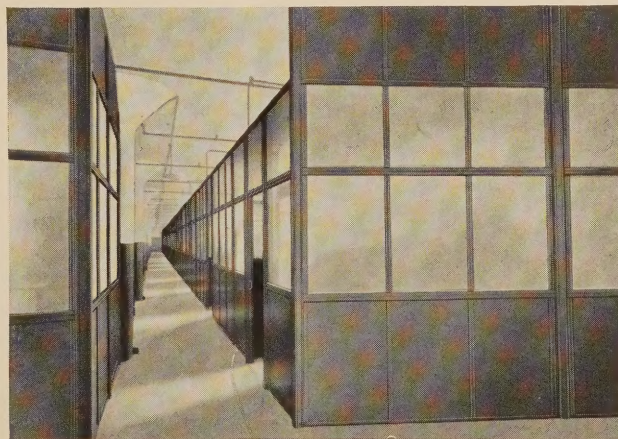

Built of Steel—Movable Without Waste

Hauserman partitions are an assembly of standard units of steel, steel and glass, or wire mesh, rigidly interlocked with concealed fastenings to form a staunch, durable partition. The partitions are furnished in a wide range of panel sizes adaptable to any condition in height or width. Ingenious, adjustable scribes are used for meeting ceilings and walls, giving a permanent appearance.

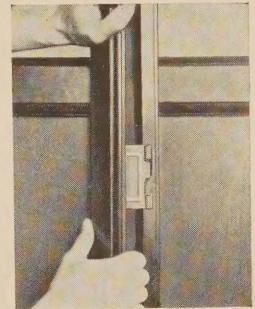

Members may be easily and quickly wired to outlets and switches wherever desired. Transoms, grilles or ventilators may be installed in any unit. Doors are interchangeable with panel units of the same width.

Individuality and Beauty Available at No Extra Cost

These partitions are of a clean-cut, well-balanced design, strong and sturdy in construction. Finishes are available to harmonize with any surroundings.

MOVABLE PARTITIONS

Types T & R

EVERYTHING we know of a value-creating character, plus the skill acquired through twelve years' practical experience, finds its fullest expression in our Types "T" and "R" partitions. These partitions are especially designed for dividing and subdividing office space *quickly* and *economically*.

Types "T" and "R" partitions are an assembly of *standard interchangeable* units of steel, rigidly interlocked with concealed fastenings to form a staunch, durable partition. Their design is frankly steel—softened by small well-studied mouldings properly placed and judiciously used. The highest grade material is used throughout.

Doors are made of hollow metal stiles and rails, and are welded into an integral unit. They can be furnished in one and two panel design....30" and 40" wide. Panel units can be removed and doors put in their place.

Door checks, master-keyed locks, transoms, grills, ventilators, wickets, all *real* hardware, are a part of standardized equipment. Patented picture

hooks furnish a detail that adds utility and livability to the product.

Wiring runways to conceal telephone and electric wires are provided in easily accessible chases, in the base, chair rail, cornice and posts. Outlets can be located to meet the needs and convenience of the customer.

There are 72 standardized colors from which to choose.... all restful, refined, quiet, smart and livable. The finish, whether in one or two tone effect, or a replica of fine walnut or mahogany, is absolutely permanent.

Hauserman reputation is built into Hauserman partitions.

The policy of the Hauserman Company is to sell a *result*—the job is erected—glazed, and finished, *complete*. The job is delivered to the customer in the form we want him to have it. That is the best insurance the customer can buy—it is the biggest thing we have to sell.

The Hauserman Organization is reliable, experienced, and KNOWS one thing well—PARTITIONS.

MOVABLE STEEL PARTITIONS

THE SUM OF ALL THE PARTS

WHAT YOU GET WHEN YOU BUY HAUSERMAN PARTITIONS

Experience—Twelve years exclusively in this field; twenty years contracting experience; plus a trained, nation-wide engineering and erection staff assures prompt deliveries and efficient and rapid installation of any sized job — anywhere.

Leadership—The obligation of leadership is to lead. Hauserman is the largest manufacturer of steel partitions. The name Hauserman stands for integrity of construction and materials.

Types—Five types of partitions from which to choose . . . for executive and general office, factories, shop rooms, garages and show rooms.

Delivery—Five days delivery from stock in Cleveland on any standard job requiring not more than two coats of paint.

Material—All exposed members are made of full cold rolled, annealed, stretcher level, furniture steel.

Color—Seventy-two distinctive colors from which to choose. Colors that harmonize with furniture and fixtures. Expert color and decorative advice without obligation.

The Hauserman "Book of Colors" makes it easy to select the particular color you prefer.

Hardware—We furnish locks, automatic door checks, transoms, ventilators, grills, wickets . . . all *real* hardware, . . . designed by us and built especially for us so that we may offer a 100% answer to any demands for hardware.

Design—Slender posts, simple lines, well-balanced design, strong and sturdy construction.

Doors—that do not swell or warp, squeak, or stick, fit perfectly and remain so. One or two panel, glass or steel.

Picture Hooks—placed within especially slotted transom rails.

Wiring—Every member may be wired . . . chair rails, cornice, bases, and posts. Telephone and electric wires are concealed in hollow members and lead to desired locations for outlets.

Fillers—Top fillers are scribed neatly to the beam and are painted to match the color of the ceilings. End fillers extend from nearest post into the steel moulding on the wall.

Assembly—Clips instead of bolts used to assemble partitions. Erection simply means clipping the units together. Adjustable mop strips and top fillers give them that part-of-the-building-appearance.

Flexibility—Maximum movability without waste . . . can be added to or rearranged overnight to meet new conditions of operation.

Layouts—Whether you require 10 feet or 10,000 feet, Hauserman will survey your requirements, submit a suggestive sketch of your office for your approval and show you how to economize your space, without obligation.

Old Customers—We can add to and match the first installation that we made twelve years ago.
